

## **Anne Muller - Print-making workshop**

Come along and make styrofoam printing plates then use various methods to print them up.

Bring:

- small simple drawing no bigger than A5 as that is the size of the plates,
- a few sheets of A4 paper for printing, coloured or just plain cartridge, anything you feel like printing on.
- some acrylic paint, just the cheap variety is fine everything else will be supplied.

Hopefully we can have a bit of fun and go home with some interesting prints.
